

Type of capture	Description
Manual	Following authorisation of the operation by the bank, the amount must be captured by the merchant manually
Auto	Following authorisation of the operation by the bank, the amount is captured straight away

## Entering the reference number and merchant reference number

The reference number and the merchant reference number are used for unique identification of the operation within the application.

The merchant reference number is used as a payment reference, which is specified in the corresponding EPA file issued by your bank.

### Reference Number

Please note that operations cannot be assigned or created without the input of a unique reference number (payment reference).

The application automatically generates the merchant reference number for every operation. The merchant reference number allows you to identify each operation uniquely. You only need to enter the merchant reference number if you wish to add a recurring direct debit or a final direct debit to an operation that already exists.

## Entering information about your shopping cart

This is where you can enter the merchandise or services that your customer ordered from you.

### "Information about your shopping cart" input field

The "Information about your shopping cart" input field must be filled in according to the rules for the payment method and the payment method provider applicable when the operation was created. The corresponding parameters in the payment methods are "OrderDesc" and "OrderDesc2".

## Entering the invoice recipient

Invoice recipients must be entered as follows: First name, last name (e.g. Joe Bloggs)

## Selecting the country code for the iDEAL issuer ID

You only need to select the country code of the country of origin if you are using the iDEAL issuer ID online payment system.

The country code is a parameter required by the iDEAL issuer ID online payment system.

Country code	Description
DE	Germany
AT	Austria
BE	Belgium
NL	The Netherlands
ES	Spain
CH	Switzerland
PL	Poland
IT	Italy

## Selecting the online payment system (iDEAL issuer ID)

iDEAL is an online payment system from The Netherlands. Use of the iDEAL online payment system is very widespread in The Netherlands. This is why you only need to select the online payment system if the payment link is being sent to a customer in The Netherlands.

If you know which online payment system your customer uses, you can select the online payment system in advance. The online payment system selected will be shown to your customer as the first payment method.

## Creating a "Pay by link" payment

The screenshot shows a configuration page for 'Pay by link' with various input fields and buttons. The interface is divided into several sections: 'Operation characteristics', 'Payment system details', 'Payment system', 'Payment method', and 'Payment link'. The 'Operation characteristics' section includes fields for 'Operation characteristics', 'Email', 'Send payment link', and 'New terminal operation'. The 'Payment system details' section includes fields for 'Payment system', 'Payment system ID', 'Payment system name', and 'Payment system description'. The 'Payment system' section includes fields for 'Payment system', 'Payment system ID', 'Payment system name', and 'Payment system description'. The 'Payment method' section includes fields for 'Payment method', 'Payment method ID', 'Payment method name', and 'Payment method description'. The 'Payment link' section includes fields for 'Payment link', 'Payment link ID', 'Payment link name', and 'Payment link description'. At the bottom of the page, there are two buttons: 'Preview' and 'Show Payment link'.

1. "Operation characteristics" input field
2. Input field for the email
3. "Execute action" button
4. Drop-down "Send payment link" menu
5. "New terminal operation" button

1. Fill in the operation characteristics and other inputs as necessary.
2. Select the Preview or Show Payment link.

Action	Beschreibung
Preview	will redirect to the payment page
Show payment link	A pop-up with the link is shown, which the merchant can copy and send it to the customer

# A "Pay by link" payment process from the customer's perspective

Once the link is generated the merchant should send the link to the customer. No automatic email generation is possible from Pay by link terminal.

1. The customer clicks on the payment link in the email received.

The customer is forwarded to the hosted payment page to select the payment method.

<input type="radio"/> Alipay	<input type="radio"/> Bancontact	<input type="radio"/> Visa
<input type="radio"/> MasterCard	<input type="radio"/> American Express	<input type="radio"/> Diners Club International
<input type="radio"/> JCB	<input type="radio"/> CUP	<input type="radio"/> Lastschrift
<input type="radio"/> giropay	<input type="radio"/> IDEAL	<input type="radio"/> Przelewy 24
<input type="radio"/> paydirekt	<input type="radio"/> PayPal	<input type="radio"/> Sofort

Weiter

1. "Payment" selection field
2. "Next" button

2. The customer selects the payment method and clicks on the "Next" button

3. The customer enters their payment data and completes the payment process required by the payment method.

The customer then receives either a confirmation or error message. If the error message appears, the customer can click on the link again and repeat the inputs.

## Payment Successful.

Your merchant will get in touch with you soon. If you have questions please answer on the mail you've received with the payment link.

## Zahlung Erfolgreich

Ihr Händler wird sich Kürze bei Ihnen melden. Für weitere Fragen antworten Sie bitte auf die E-Mail, die Sie mit dem Link zum Bezahlen erhalten haben.
