Appearance

Linchpin Theme configuration

To adjust the appearance, the logo and the name of the instance, go to "Linchpin Theme configuration" or `<base-url>/admin/linchpin/theme/configure.action`

This configuration overwrites the adjustments made in "Colour Scheme"

Colour Scheme

If you miss some adjustments, you can additionally edit the default Confluence Colour Scheme at "Color Scheme" or `<base-url>/admin/lookandfeel.action`

Site Logo and Favicon

You can change the site title, the site logo and the favicon. Search for "Site Logo and Favicon" or go to `<base-url>/admin/sitelogo/view-sitelogo.action`

The Display Name at the header, you can adjust in "Linchpin Theme configuration"

Space Icon

To customize the space icons in the sidebar on the left, go to "Configure Sidebar" via "Spacetools" in the respective space at the bottom of the sidebar. Click on the edit pen next to the existing icon to upload your new image. Recommended is a square image with the dimensions 400x400.

Login Screen

You can customize the "Login Screen" at `<base-url>/admin/linchpinlogin/login-screen.action`

Footer text

You can edit the first and second footer column at "Footer Configuration" `<base-url>/admin/linchpin-footer/theme/configure-footer.action` and the third footer column in "Linchpin Theme configuration" Advanced Custom JS `<base-url>/admin/linchpin/theme/configure.action`

Menu & Navigation

Navigation styling

Edit the navigation styling at "Linchpin Theme configuration" or `<base-url>/admin/linchpin/theme/configure.action`

Menu

Edit the "Menu Settings" at `<base-url>/admin/plugins/menu-editor/menusettings.action` and the "Menu Structure" at `<base-url>/admin/plugins/menu-editor/menueditor.action`

Don't forget the Save & Publish the Menu Structure.

Workflows

You can customize the Workflows at "Global Workflows Template" or `<base-url>/admin/viewglobalworkflows.action`

Be careful as the changes are adapted to all spaces where the workflow is linked to!

Space Templates

For the creation of new pages you can add templates so that you do not need to create the structure every time from scratch. Do this in your desired space at Space Tools > Content Tools > Templates or `/pages/templates2/listpagetemplates.action?key=SPACEKEY`

System-Updates (Confluence & Apps)

The instance, Confluence and its Apps need updates from time to time. Major updates are initiated and communicated by Computop. Smaller updates for recommended Apps are performed directly by Computop.

It is not recommended to install additional apps. If you install other apps, Computop does not guarantee compatibility.
