

A2 Country codes

Country Codes

Computop Paygate can check the origin of credit cards to help prevent potential fraud: If you enter the delivery country as a parameter, Paygate returns the country of origin of Visa- and MasterCard-Credit cards. If the delivery country differs from the card nationality Paygate will send a notification by email.

To use fraud prevention, Merchants can transmit the three-digit numerical country code, the abbreviation of the delivery or invoice country to Computop Paygate in the Zone parameter. Please note, there is a maximum length of 1100 characters. In some cases it is possible to use the 2-digit country code according to ISO 3166-1, which can be found in the following table. The values in the Zone parameter must correspond to the ISO 3166 country codes in the following table:

Country names	Code	3dig	2dig
Afghanistan	004	AFG	AF
Aland Islands	248	ALA	AX
Albania	008	ALB	AL
Algeria	012	DZA	DZ
American Samoa	016	ASM	AS
