# Payment Methods Overview

| Payment Method | Logo | Info | Type |
|---|---|---|---|
| 7-Eleven |  | 7-Eleven is a cash payment method. After selecting goods or services, consumers reach the merchant's checkout site. The consumer selects 7-Eleven. The merchant site then generates the billing details as a print-optimised document. The customer can pay at a participating store. Once the payment has been received, the merchant ships the purchase. | Payments by Cash-In / Bill |
| Alipay |  | Customers and merchants can send and receive payments with the E-Wallet from China's leading online payment system. Alipay has over 800 million registered users and in 2014 it processed over 100 million online payments per day. | Payments by eWallet |
| Alipay via PPRO |  | Customers and merchants can send and receive payments with the E-Wallet from China's leading online payment system. Alipay has over 800 million registered users and in 2014 it processed over 100 million online payments per day. | Payments by eWallet |
| Apple Pay |  | Apple Pay is a digital wallet for storing payment details, providing an easy and secure way to pay in iOS applications, websites running on Safari browser and contactless POS terminals. In applications and on websites, users can quickly and securely provide their payment, shipping, and contact information to check out with just one touch using Apple's Touch ID. Apple Pay's simplicity increases conversion rates and new user adoption that come with it. | Payments by eWallet |

| | | | |
|---|---|---|---|
| Arvato BIG |  | Computop Paygate is replacing the eScore interface with the arvato interface BIG (Business Information Gateway). eScore will be shut down by mid 2016, until which time it controls access to the scoring services of Arvato Financial Solutions. As a SOAP web service BIG is based on standard technologies and can therefore be integrated with different programming languages on different platforms. BIG uses the XML Digital Signature (XML DSig) process and meets current requirements on data protection and security. | Risk Management |

|---|---|---|---|
| Enterpay |  | Enterpay is a Finnish fintech startup which has a mission to boost B2B (business-to-business) ecommerce and optimise the payment process for B2B ecommerce by automating the counterparty risk assessment process.<br><br>Invoice payments are the preferred option in B2B commerce, but these are often handled manually, which makes them time-consuming and potentially risky. As online purchases in the B2B market continue to grow rapidly, B2B buyers expect the same smooth experience that they know from B2C ecommerce. Enterpay has developed a technical solution that is equipped to meet the changing expectations of the B2B customers and allows them to make invoice payments in B2B transactions easily, quickly and securely. Enterpay's payment scheme consists of a platform where all necessary parties can enable automated B2B trade and cooperate seamlessly. Enterpay partners with banks and PSPs so that they can offer purely digital and fully automated invoicing and factoring solution to their B2B merchant customers. The technology automatically carries out the fraud and credit risk assessment and integrates to various ecommerce platforms and payment gateways. | Payments by Invoice and Installments |
