### Definitions

#### Data formats

| Format | Description                                      |
|--------|--|
| a      | alphabetical                                     |
| as     | alphabetical with special characters             |
| n      | numeric  |
| an     | alphanumeric                                     |
| ans    | alphanumeric with special characters             |
| ns     | numeric with special characters                  |
| bool   | boolean expression (true or false)               |
| 3      | fixed length with 3 digits/characters            |
| ..3    | variable length with maximum 3 digits/characters |
| enum   | enumeration of allowed values                    |
| dttm   | ISODateTime (YYYY-MM-DDThh:mm:ss)                |

### Abbreviations

| Abbreviation | Description | Comment   |
|--------------|-------------|---|
| CND          | condition   |   |
| M            | mandatory   | If a parameter is mandatory, then it must be present  |
| O            | optional    | If a parameter is optional, then it can be present, but it is not required  |
| C            | conditional | If a parameter is conditional, then there is a conditional rule which specifies whether it is mandatory or optional |

**Notice:** Please note that the names of parameters can be returned in upper or lower case.

## Payment with PayU Africa via Paygate form interface

To make a payment with PayU in South Africa or Nigeria, please use the following URL:

<https://www.computop-paygate.com/payuafrica.aspx>

**Notice:** For security reasons, Computop Paygate rejects all payment requests with formatting errors. Therefore, please use the correct data type for each parameter.

The following table describes the [encrypted payment request parameters](#):

| Key         | Format   | CND | Description  |
|-------------|----------|-----|--|
| Merch antID | ans..30  | M   | MerchantID, assigned by Computop. Additionally this parameter has to be passed in plain language too.  |
| TransID     | ans..64  | M   | TransactionID provided by you which should be unique for each payment  |
| refnr       | ns..30   | O   | Merchant's unique reference number   |
| Amou nt     | n..10    | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit).   |
| Curren cy   | a3       | M   | Currency, three digits DIN / ISO 4217, e.g. EUR. Presently only KES, NGN and ZAR allowed. Please find an overview here: <a href="#">A1 Currency table</a>  |
| MAC         | an64     | M   | Hash Message Authentication Code (HMAC) with SHA-256 algorithm. Details can be found here: <ul style="list-style-type: none"> <li>• <a href="#">HMAC Authentication (Request)</a></li> <li>• <a href="#">HMAC Authentication (Notify)</a></li> </ul>   |
| URLS uccess | ans..256 | M   | Complete URL which calls up Paygate if payment has been successful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between Paygate and shop, please use the parameter <a href="#">UserData</a> . <p><b>i Common notes:</b></p> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLsuccess. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>             |
| URLF ailure | ans..256 | M   | Complete URL which calls up Paygate if payment has been unsuccessful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between Paygate and shop, please use the parameter <a href="#">UserData</a> . <p><b>i Common notes:</b></p> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLsuccess/URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul> |
| Respo nse   | a7       | O   | Status response sent by Paygate to <a href="#">URLSuccess</a> and <a href="#">URLFailure</a> , should be encrypted. For this purpose, transmit <a href="#">Response=encry pt</a> parameter.  |

|                       |           |   |  |
|-----------------------|-----------|---|--|
| URLNotify             | ans..256  | M | Complete URL which Paygate calls up in order to notify the shop about the payment result. The URL may be called up only via port 443. It may not contain parameters: Use the <a href="#">UserData</a> parameter instead.<br><br><b>i Common notes:</b> <ul style="list-style-type: none"><li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li><li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLsuccess/URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li></ul>  |
| UserData              | ans..1024 | O | If specified at request, Paygate forwards the parameter with the payment result to the shop.   |
| ReqID                 | ans..32   | O | To avoid double payments or actions (e.g. by ETM), enter an alphanumeric value which identifies your transaction and may be assigned only once. If the transaction or action is submitted again with the same ReqID, Computop Paygate will not carry out the payment or new action, but will just return the status of the original transaction or action.<br><br>Please note that the Computop Paygate must have a finalized transaction status for the first initial action (authentication /authorisation). This does not apply to 3-D Secure authentications that are terminated by a timeout. The 3-D Secure Timeout status does not count as a completed status in which the ReqID functionality on Paygate does not take effect. Submissions with identical ReqID for an open status will be processed regularly.<br><br><b>Notice:</b> Please note that a ReqID is only valid for 12 month, then it gets deleted at the Paygate. |
| Order Desc            | ans..100  | M | Description of purchased goods, unit prices etc.   |
| CountryCode           | a..3      | O | Country code 2 or 3 digits according to ISO 3166 for selecting the credentials. Presently only KEN, ZAF and NGA allowed. The default is ZAF.   |
| Plain                 | ans..50   | O | A single value to be set by the merchant to return some information unencrypted in response/notify, e.g. the MID.<br><br>"Plain"-parameter is part of encrypted "Data" in Computop Paygate and therefore protected against manipulation.   |
| Custom                | ans..1024 | O | "Custom"-parameter is added to the request data before encryption and is part of encrypted "Data" in Computop Paygate request. By this they are protected against manipulation by a consumer.<br><br>The Custom-value is added to the Computop Paygate response in plain text and the " " is replaced by a "&". By this you can put a single value into Custom-parameter and get multiple key-value-pairs back in response for your own purpose.<br><br>Please find a samples here: <a href="#">Custom</a>   |
|                       |           |   | <b>Customer data</b>   |
| FirstName             | ans..64   | M | First name of the customer   |
| LastName              | ans..64   | M | Last name of the customer  |
| eMail                 | ans..64   | O | Email address of the customer  |
| Mobile Nr             | ans..40   | O | Customer's mobile telephone number   |
| Social SecurityNumber | ans..50   | O | Customer's Social security number  |
| CustomerID            | ans..64   | O | Customer number.<br><br>If customer number is not submitted instead the email address is transferred to PayU, provided that this is submitted.   |

|--------|-----------|-----|--|--|
| Custom | ans..1024 | O   | "Custom"-parameter is added to the request data before encryption and is part of encrypted "Data" in Computop Paygate request. By this they are protected against manipulation by a consumer.<br><br>The Custom-value is added to the Computop Paygate response in plain text and the ":" is replaced by a "&". By this you can put a single value into Custom-parameter and get multiple key-value-pairs back in response for your own purpose.<br><br>Please find a samples here: <a href="#">Custom</a> | Der "Custom"-Parameter wird vor der Verschlüsselung an den Aufruf angehängt und ist Teil des verschlüsselten "Data" im Computop Paygate Aufruf. Dadurch ist der Wert gegen Manipulation geschützt.<br><br>Der Custom-Wert wird dann in Klartext an die Computop Paygate-Antwort angehängt und dabei wird ":" durch "&" ersetzt. Dadurch können Sie einen Custom-Wert übergeben und bekommen mehrere Key-Value-Paare zu Ihrer eigenen Verwendung in der Antwort zurück.<br><br>Hier finden Sie ein Beispiel: <a href="#">Custom</a> |

Return parameters for URLSuccess, URLFailure and URLNotify with PayU Africa WebCheckout

## Credit card payment with PayU Africa via Paygate form interface

In order to execute a credit card payment in South Africa or Nigeria with PayU Africa via a Paygate form, please use the following URL:

<https://www.computop-paygate.com/payssl.aspx>

**Notice:** For security reasons, Computop Paygate rejects all payment requests with formatting errors. Therefore, please use the correct data type for each parameter.

The following table describes the [encrypted payment request parameters](#):

| Key          | Format    | CND | Description  |
|--------------|-----------|-----|--|
| Merch antID  | ans..30   | M   | MerchantID, assigned by Computop. Additionally this parameter has to be passed in plain language too.  |
| TransID      | ans..64   | M   | TransactionID provided by you which should be unique for each payment  |
| RefNr        | ns..30    | M   | Unique reference number which appears on your printed card account or in the EPA-file (Electronic Payment Advice). Format must be mutually agreed beforehand with <a href="#">Computop Helpdesk!</a>   |
| Amou nt      | n..10     | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit).   |
| Curren cy    | a3        | M   | Currency, three digits DIN / ISO 4217, e.g. EUR. Presently only KES, NGN and ZAR allowed. Please find an overview here: <a href="#">A1 Currency table</a>  |
| MAC          | an64      | M   | Hash Message Authentication Code (HMAC) with SHA-256 algorithm. Details can be found here: <ul style="list-style-type: none"> <li>• <a href="#">HMAC Authentication (Request)</a></li> <li>• <a href="#">HMAC Authentication (Notify)</a></li> </ul>   |
| URLS uccess  | ans..256  | M   | Complete URL which calls up Paygate if payment has been successful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between Paygate and shop, please use the parameter <a href="#">UserData</a> .<br><b>i Common notes:</b> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLsuccess. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>   |
| URLF ailure  | ans..256  | M   | Complete URL which calls up Paygate if payment has been unsuccessful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between Paygate and shop, please use the parameter <a href="#">UserData</a> .<br><b>i Common notes:</b> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLsuccess/URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>   |
| Respo nse    | a7        | O   | Status response sent by Paygate to <a href="#">URLSuccess</a> and <a href="#">URLFailure</a> , should be encrypted. For this purpose, transmit <a href="#">Response=encry pt</a> parameter.  |
| URLN otify   | ans..256  | M   | Complete URL which Paygate calls up in order to notify the shop about the payment result. The URL may be called up only via port 443. It may not contain parameters: Use the <a href="#">UserData</a> parameter instead.<br><b>i Common notes:</b> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLsuccess/URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>   |
| UserD ata    | ans..1024 | O   | If specified at request, Paygate forwards the parameter with the payment result to the shop.   |
| ReqId        | ans..32   | O   | To avoid double payments or actions (e.g. by ETM), enter an alphanumeric value which identifies your transaction and may be assigned only once. If the transaction or action is submitted again with the same ReqID, Computop Paygate will not carry out the payment or new action, but will just return the status of the original transaction or action.<br>Please note that the Computop Paygate must have a finalized transaction status for the first initial action (authentication /authorisation). This does not apply to 3-D Secure authentications that are terminated by a timeout. The 3-D Secure Timeout status does not count as a completed status in which the ReqID functionality on Paygate does not take effect. Submissions with identical ReqID for an open status will be processed regularly.<br><b>Notice:</b> Please note that a ReqID is only valid for 12 month, then it gets deleted at the Paygate. |
| Order Desc   | ans..100  | M   | Description of purchased goods, unit prices etc.   |
| RTF          | a1        | O   | „I“ for initializing recurrent payments  |
| Countr yCode | a..3      | O   | Country code 2 or 3 digits according to ISO 3166 for selecting the credentials. Presently only KEN, ZAF and NGA allowed. The default is ZAF.   |

|                       |           |   |  |
|-----------------------|-----------|---|--|
| Plain                 | ans..50   | O | A single value to be set by the merchant to return some information unencrypted in response/notify, e.g. the MID.<br>"Plain"-parameter is part of encrypted "Data" in Computop Paygate and therefore protected against manipulation.   |
| Custom                | ans..1024 | O | "Custom"-parameter is added to the request data before encryption and is part of encrypted "Data" in Computop Paygate request. By this they are protected against manipulation by a consumer.<br><br>The Custom-value is added to the Computop Paygate response in plain text and the " " is replaced by a "&". By this you can put a single value into Custom-parameter and get multiple key-value-pairs back in response for your own purpose.<br><br>Please find a samples here: <a href="#">Custom</a> |
| <b>Customer data</b>  |           |   |  |
| FirstName             | ans..64   | M | First name of the customer   |
| LastName              | ans..64   | M | Last name of the customer  |
| eMail                 | ans..64   | O | Email address of the customer  |
| Mobile Nr             | ans..40   | O | Customer's mobile telephone number   |
| Social SecurityNumber | ans..50   | O | Customer's Social security number  |
| CustomerID            | ans..64   | O | Customer number.<br><br>If customer number is not submitted instead the email address is transferred to PayU, provided that this is submitted.   |

| Key     | Format  | CND | Description   | Beschreibung   |

| PCNr | n16    | O   | Pseudo Card Number: Random number generated by Computop Paygate which represents a genuine credit card number. The pseudo card number (PCN) starts with 0 and the last 3 digits correspond to those of the real card number. The PCN can be used like a genuine card number for authorisation, capture and credits.<br><br>PCNr is a <b>response value</b> from Computop Paygate and is sent as <b>CCNr</b> in Request or part of <b>card-JSON</b> | Pseudo Card Number: Vom Computop Paygate generierte Zufallszahl, die eine reale Kreditkartennummer repräsentiert. Die Pseudokartennummer (PKN) beginnt mit 0, und die letzten 3 Stellen entsprechen denen der realen Kartennummer. Die PKN kann wie eine Kreditkartennummer für Autorisierung, Buchung und Gutschriften verwendet werden.<br><br>PCNr ist ein <b>Antwortwert</b> von Computop Paygate und kann ebenfalls als <b>CCNr</b> im Request oder als Teil von <b>card-JSON</b> verwendet werden. |

| Key            | Format  | CND | Description  | Beschreibung  |
|----------------|---------|-----|--|---|
| CCBrand        | a..22   | O   | In combination with PCNr: Name of credit card brand like Visa, MasterCard etc.               | In Verbindung mit PCNr: Bezeichnung der Kreditkartenmarke wie VISA, MasterCard etc.                       |
| CCExpiry       | n6      | O   | In combination with PCNr: Expiry date of the credit card in the format YYYYMM.               | In Verbindung mit PCNr: Ablaufdatum der Kreditkarte im Format JJJJMM                                      |
| Masked Pan     | an..19  | O   | Masked card number 6x4   | Maskierte Kartennummer 6x4  |
| Transac tionID | ans..64 | O   | Transaction ID from PayU   | Transaktions-ID von PayU  |
| TokenE xt      | an..64  | C   | For recurring payments (RTF=1) the Token is transmitted for referencing the credit card data | Bei wiederkehrenden Zahlungen (RTF=1) wird der Token übergeben, um die Kreditkartendaten zu referenzieren |

Result parameters for socket connection with PayU Africa

## Recurring credit card payment via Server-to-Server connection

In order to execute a recurring credit card payment with PayU Africa in South Africa or Nigeria via a server-to-server connection, please use the following URL:

<https://www.computop-paygate.com/direct.aspx>

**Notice:** For security reasons, Computop Paygate rejects all payment requests with formatting errors. Therefore, please use the correct data type for each parameter.

The following table describes the [encrypted payment request parameters](#):

| Key                | Format   | CND | Description   |              |             |      |  |        |  |          |  |
|--------------------|--|-----|---|--------------|-------------|------|--|--------|--|----------|--|
| Merch antID        | ans..30  | M   | MerchantID, assigned by Computop. Additionally this parameter has to be passed in plain language too.   |              |             |      |  |        |  |          |  |
| TransID            | ans..64  | M   | TransactionID provided by you which should be unique for each payment   |              |             |      |  |        |  |          |  |
| RefNr              | ns..30   | c   | Merchant's reference number, mandatory for the initial payment of a new abo (RTF=I)   |              |             |      |  |        |  |          |  |
| Amou nt            | n..10  | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit).  |              |             |      |  |        |  |          |  |
| Curren cy          | a3   | M   | Currency, three digits DIN / ISO 4217, e.g. EUR. Presently only KES, NGN and ZAR allowed. Please find an overview here: <a href="#">A1 Currency table</a>   |              |             |      |  |        |  |          |  |
| MAC                | an64   | M   | Hash Message Authentication Code (HMAC) with SHA-256 algorithm. Details can be found here: <ul style="list-style-type: none"> <li>• <a href="#">HMAC Authentication (Request)</a></li> <li>• <a href="#">HMAC Authentication (Notify)</a></li> </ul>  |              |             |      |  |        |  |          |  |
| Capture            | an..6  | OM  | <p>Determines the type and time of capture.</p> <table border="1"> <thead> <tr> <th>Capture Mode</th><th>Description</th></tr> </thead> <tbody> <tr> <td>AUTO</td><td>Capturing immediately after authorisation (default value).</td></tr> <tr> <td>MANUAL</td><td>Capturing made by the merchant. Capture is normally initiated at time of delivery.</td></tr> <tr> <td>&lt;Number&gt;</td><td>Delay in hours until the capture (whole number; 1 to 696).</td></tr> </tbody> </table>  | Capture Mode | Description | AUTO | Capturing immediately after authorisation (default value). | MANUAL | Capturing made by the merchant. Capture is normally initiated at time of delivery. | <Number> | Delay in hours until the capture (whole number; 1 to 696). |
| Capture Mode       | Description  |     |   |              |             |      |  |        |  |          |  |
| AUTO               | Capturing immediately after authorisation (default value).                         |     |   |              |             |      |  |        |  |          |  |
| MANUAL             | Capturing made by the merchant. Capture is normally initiated at time of delivery. |     |   |              |             |      |  |        |  |          |  |
| <Number>           | Delay in hours until the capture (whole number; 1 to 696).                         |     |   |              |             |      |  |        |  |          |  |
| UserD ata          | ans..1024  | O   | If specified at request, Paygate forwards the parameter with the payment result to the shop.  |              |             |      |  |        |  |          |  |
| ReqId              | ans..32  | O   | <p>To avoid double payments or actions (e.g. by ETM), enter an alphanumeric value which identifies your transaction and may be assigned only once. If the transaction or action is submitted again with the same ReqID, Computop Paygate will not carry out the payment or new action, but will just return the status of the original transaction or action.</p> <p>Please note that the Computop Paygate must have a finalized transaction status for the first initial action (authentication /authorisation). This does not apply to 3-D Secure authentications that are terminated by a timeout. The 3-D Secure Timeout status does not count as a completed status in which the ReqID functionality on Paygate does not take effect. Submissions with identical ReqID for an open status will be processed regularly.</p> <p><b>Notice:</b> Please note that a ReqID is only valid for 12 month, then it gets deleted at the Paygate.</p> |              |             |      |  |        |  |          |  |

Result parameters for socket connection with PayU Africa

## Capture of a payment with PayU Africa

Captures are possible via a Server-to-Server connection. To carry out a Capture for a payment with PayU Africa via a Server-to-Server connection, please use the following URL:

<https://www.computop-paygate.com/capture.aspx>

**Notice:** For security reasons, Computop Paygate rejects all payment requests with formatting errors. Therefore, please use the correct data type for each parameter.

The following table describes the [encrypted payment request parameters](#):

| Key         | Format  | CND | Description  |
|-------------|---------|-----|--|
| Merch antID | ans..30 | M   | MerchantID, assigned by Computop. Additionally this parameter has to be passed in plain language too.  |
| PayID       | an32    | M   | ID assigned by Paygate for the payment to be captured  |
| TransID     | ans..64 | M   | TransactionID provided by you which should be unique for each payment  |
| Amou nt     | n..10   | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit).   |
| Curren cy   | a3      | M   | Currency, three digits DIN / ISO 4217, e.g. EUR. Presently only KES, NGN and ZAR permitted. Please find an overview here: <a href="#">A1 Currency table</a>  |
| MAC         | an64    | M   | Hash Message Authentication Code (HMAC) with SHA-256 algorithm. Details can be found here: <ul style="list-style-type: none"> <li>• <a href="#">HMAC Authentication (Request)</a></li> <li>• <a href="#">HMAC Authentication (Notify)</a></li> </ul>   |
| refnr       | ns..30  | O   | Merchant's unique reference number   |
| ReqId       | ans..32 | O   | To avoid double payments or actions (e.g. by ETM), enter an alphanumeric value which identifies your transaction and may be assigned only once. If the transaction or action is submitted again with the same ReqID, Computop Paygate will not carry out the payment or new action, but will just return the status of the original transaction or action.<br><br>Please note that the Computop Paygate must have a finalized transaction status for the first initial action (authentication /authorisation). This does not apply to 3-D Secure authentications that are terminated by a timeout. The 3-D Secure Timeout status does not count as a completed status in which the ReqID functionality on Paygate does not take effect. Submissions with identical ReqID for an open status will be processed regularly.<br><br><b>Notice:</b> Please note that a ReqID is only valid for 12 month, then it gets deleted at the Paygate. |

| Key   | Format | CND | Description   | Beschreibung   |

Response parameters for credit of credit card payments with PayU Africa via socket connection

## Batch processing via the interface

Basic information about using Batch files and about their structure can be found in the Batch Manager manual. Within batch processing not all functions are available which are usually available for the online interface.

This section describes the parameters which must be transferred within the data set (**Record**) for executing payments / credits with PayU Africa and which information can be found within the response file about the payment status.

Following table gives an overview of all batch versions that are possible for a specific action and their specialities:

| Action              | Version     | Description  |
|---------------------|-------------|--|
| Authorize (CC only) | 1.0 / 2.0   | Standard version without return of parameter Code        |
|                     | 1.x / 2.x   | with RefNr (valid for all versions other than 1.0)       |
|                     | 1.2 / 2.2   | with textfeld1, textfeld2, RTF, cardholder               |
|                     | 1.21 / 2.21 | with textfeld1, textfeld2, RTF, approvalcode, cardholder |
|                     | 1.3 / 2.3   | with CVC   |
|                     | 1.5 / 2.5   | with Zone  |
| Sale (CC only)      | 1.0 / 2.0   | Standard version without return of parameter Code        |
|                     | 1.x / 2.x   | with RefNr (valid for all versions other than 1.0)       |
|                     | 1.2 / 2.2   | with textfeld1, textfeld2, RTF, cardholder               |
|                     | 1.21 / 2.21 | with textfeld1, textfeld2, RTF, approvalcode, cardholder |
|                     | 1.3 / 2.3   | with CVC   |
|                     | 1.5 / 2.5   | with Zone  |
| Capture             | 1.0 / 2.0   | Standard version without return of parameter Code        |
|                     | 1.x / 2.x   | with RefNr (valid for all versions other than 1.0)       |
| Credit              | 1.0 / 2.0   | Standard version without return of parameter Code        |
|                     | 1.x / 2.x   | with RefNr (valid for all versions other than 1.0)       |
| Reverse             | 1.0 / 2.0   | Standard version without return of parameter Code        |
|                     | 1.x / 2.x   | with RefNr (valid for all versions other than 1.0)       |

Description of the possible batch versions

The structure for a PayU Africa transaction within a Batch file to be submitted is the following:

```

HEAD,<MerchantID>,<Date>,<Version>
CC,Authorize,<Amount>,<Currency>,<TransID>,(<RefNr>,<CCBrand>,<CCNr|PCNr>,[<CCV>],<CCExpiry>,<OrderDesc>[,<textfeld1>,<textfeld2>,<RTF>,<approvalcode>,<cardholder>,<Zone>]
CC,Sale,<Amount>,<Currency>,<TransID>,(<RefNr>,<CCBrand>,<CCNr|PCNr>,[<CCV>],<CCExpiry>,<OrderDesc>[,<textfeld1>,<textfeld2>,<RTF>,<approvalcode>,<cardholder>,<Zone>]
CC,Capture,<Amount>,<Currency>,<TransID>,(<RefNr>,<PayID>
CC,Credit,<Amount>,<Currency>,<TransID>,(<RefNr>,<PayID>
CC,Reverse,<Amount>,<Currency>,<TransID>,(<RefNr>,<PayID>
FOOT,<CountRecords>,<SumAmount>

```

Example for Master MID function:

```

HEAD,[Master]MerchantID,Date,2.x
Type,Action,[Slave]MID,Amount,Currency,TransID,Data (depends on Action)
FOOT,CountRecords,SumAmount

```

The following table describes the individual fields and values used within the data set (record) in the batch file:

| Key        | Format   | CND | Description   |
|------------|----------|-----|---|
| Type       | a..11    | M   | HEAD for Header, FOOT for Footer, CC for Credit card and PayU AfrWC for WebCheckout Subsequent transactions   |
| Action     | a..20    | M   | The parameter Action defines the type of transaction:<br>Authorize<br><br>Sale<br><br>Capture<br><br>Credit<br><br>Reverse  |
| Amount     | n..10    | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit).  |
| Currency   | a3       | M   | Currency, three digits DIN / ISO 4217, e.g. EUR. Presently only KES, NGN and ZAR allowed. Please find an overview here: <a href="#">A1 Currency table</a>   |
| TransID    | ans..64  | M   | TransactionID provided by you which should be unique for each payment   |
| refnr      | ns..30   | O   | Merchant's unique reference number  |
| PayID      | an32     | M   | ID assigned by Paygate for this transaction   |
| Order Desc | ans..127 | O   | Description of purchased goods, unit prices etc.  |
| CCBrand    | a..22    | M   | Credit card brand like VISA, MasterCard, AMEX etc.<br><br>Please note the spelling!   |
| CCNr       | n..19    | M   | Credit card number for credit card payments.<br><br>It can be filled: <ul style="list-style-type: none"><li>• either with the real credit card number (PAN)</li><li>• or with the pseudo card number that you have received previously in a Paygate response in parameter PCNr.</li></ul> <p><b>Info:</b> With <a href="#">3-D Secure 2.x</a> the CCNr (PAN or PCNr) is sent as <a href="#">card.JSON</a>.</p> <p><b>Info:</b> We recommend to use "<a href="#">Hosted Payment Page</a>" or <a href="#">Credit Card Form (paySSL)</a> for simplified <a href="#">PCI DSS</a> certification and usage of PCNr.</p> |
| PCNr       | n16      | O   | Pseudo Card Number: Random number generated by Computop Paygate which represents a genuine credit card number. The pseudo card number (PCN) starts with 0 and the last 3 digits correspond to those of the real card number. The PCN can be used like a genuine card number for authorisation, capture and credits.<br><br>PCNr is a <b>response value</b> from Computop Paygate and is sent as <a href="#">CCNr</a> in Request or part of <a href="#">card-JSON</a>  |
| CCV2       | n..4     | O   | Card verification number in Version 1.3: In the case of Visa and MasterCard the last 3 numbers on the signature strip of the credit card. 4 numbers in the case of American Express.  |
| CCEXpiry   | n6       | M   | Expiry date of the credit card in the format YYYYMM, e.g. 202207.   |

| Key    | Format | CND | Description  | Beschreibung  |
|--------|--------|-----|--|---|
| Amount | n..10  | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit). | Betrag in der kleinsten Währungseinheit (z.B. EUR Cent). Bitte wenden Sie sich an den <a href="#">Computop Helpdesk</a> , wenn Sie Beträge < 100 (kleinste Währungseinheit) buchen möchten. |

| Key  | Format | CND | Description  | Beschreibung   |
|------|--------|-----|--|--|
| PCNr | n16    | O   | Pseudo Card Number: Random number generated by Computop Paygate which represents a genuine credit card number. The pseudo card number (PCN) starts with 0 and the last 3 digits correspond to those of the real card number. The PCN can be used like a genuine card number for authorisation, capture and credits.<br><br>PCNr is a <b>response value</b> from Computop Paygate and is sent as <a href="#">CCNr</a> in Request or part of <a href="#">card-JSON</a> | Pseudo Card Number: Vom Computop Paygate generierte Zufallszahl, die eine reale Kreditkartennummer repräsentiert. Die Pseudokartennummer (PKN) beginnt mit 0, und die letzten 3 Stellen entsprechen denen der realen Kartennummer. Die PKN kann wie eine Kreditkartennummer für Autorisierung, Buchung und Gutschriften verwendet werden.<br><br>PCNr ist ein <b>Antwortwert</b> von Computop Paygate und kann ebenfalls als <a href="#">CCNr</a> im Request oder als Teil von <a href="#">card-JSON</a> verwendet werden. |

| Key   | Format | CND | Description  | Beschreibung  |
|-------|--------|-----|--|---|
| CCVVC | n..4   | O   | Card verification number in Version 1.3: In the case of Visa and MasterCard the last 3 numbers on the signature strip of the credit card. 4 numbers in the case of American Express. | Kartenprüfnummer in Version 1.3: Bei Visa und MasterCard die letzten 3 Ziffern auf dem Unterschriftsfeld der Kreditkarte. Bei American Express 4 Ziffern. |

| Key      | Format | CND | Description   | Beschreibung  |
|----------|--------|-----|---|---|
| CCExpiry | n6     | M   | Expiry date of the credit card in the format YYYYMM, e.g. 202207. | Ablaufdatum der Kreditkarte im Format YYYYMM, z.B. 202207 |

Description of fields within the record for Batch files

The record area within the response file for Batch transactions looks as follows:

```

HEAD,<MerchantID>,<Date>,<Version>
CC,Authorize,<Amount>,<Currency>,<TransID>,(<RefNr>,<PayID>,<CCBrand>,<CCNr | PCNr>,[<CCVVC>,<CCEExpiry>,
<OrderDesc>[,<textfeld1>,<textfeld2>,<RTF>,<approvalcode>,<cardholder>,<Zone>],<Status>,<Code>
CC,Sale,<Amount>,<Currency>,<TransID>,(<RefNr>,<PayID>,<CCBrand>,<CCNr | PCNr>,[<CCVVC>,<CCEExpiry>,
<OrderDesc>[,<textfeld1>,<textfeld2>,<RTF>,<approvalcode>,<cardholder>,<Zone>],<Status>,<Code>
CC,Capture,<Amount>,<Currency>,<TransID>,(<RefNr>,<PayID>[<textfeld1>,<textfeld2>,<RTF>,<approvalcode>,
<cardholder>],<Status>,<Code>
CC,Credit,<Amount>,<Currency>,<TransID>,(<RefNr>,<PayID>,<Status>,<Code>
CC,Reverse,<Amount>,<Currency>,<TransID>,(<RefNr>,<PayID>,<Status>,<Code>
FOOT,<CountRecords>,<SumAmount>
```

The following table describes the response parameters which the Batch Manager saves in the Record area for each transaction (standard parameters not explained here, such as <TransID> or <RefNR> and request parameters are returned unchanged and correspond to the call as specified before):

| <b>Key</b> | <b>Format</b> | <b>CND</b> | <b>Description</b>   |
|------------|---------------|------------|--|
| Action     | a..20         | M          | The parameter Action defines the type of transaction:<br><br>Authorize<br><br>Sale<br><br>Capture<br><br>Credit<br><br>Reverse |
| PayID      | an32          | M          | ID assigned by Paygate for this transaction  |
| Status     | a..50         | M          | OK ( <a href="#">URLSuccess</a> ) or FAILED ( <a href="#">URLFailure</a> )   |
| Code       | n8            | M          | Error code according to Paygate Response Codes ( <a href="#">A4 Error codes</a> )  |

| <b>Key</b> | <b>Format</b> | <b>CND</b> | <b>Description</b>                          | <b>Beschreibung</b>                            |
|------------|---------------|------------|---|--|
| PayID      | an32          | M          | ID assigned by Paygate for this transaction | Vom Paygate vergebene ID für diese Transaktion |

| <b>Key</b> | <b>Format</b> | <b>CND</b> | <b>Description</b>   | <b>Beschreibung</b>  |
|------------|---------------|------------|--|--|
| Status     | a..50         | M          | OK ( <a href="#">URLSuccess</a> ) or FAILED ( <a href="#">URLFailure</a> ) | OK ( <a href="#">URLSuccess</a> ) oder FAILED ( <a href="#">URLFailure</a> ) |

| <b>Key</b> | <b>Format</b> | <b>CND</b> | <b>Description</b>  | <b>Beschreibung</b>   |
|------------|---------------|------------|---|---|
| Code       | n8            | M          | Error code according to Paygate Response Codes ( <a href="#">A4 Error codes</a> ) | Fehlercode gemäß Paygate Antwort-Codes ( <a href="#">A4 Fehlercodes</a> ) |

Description of result parameters within the record for Batch files
