## About PayU CEE Single

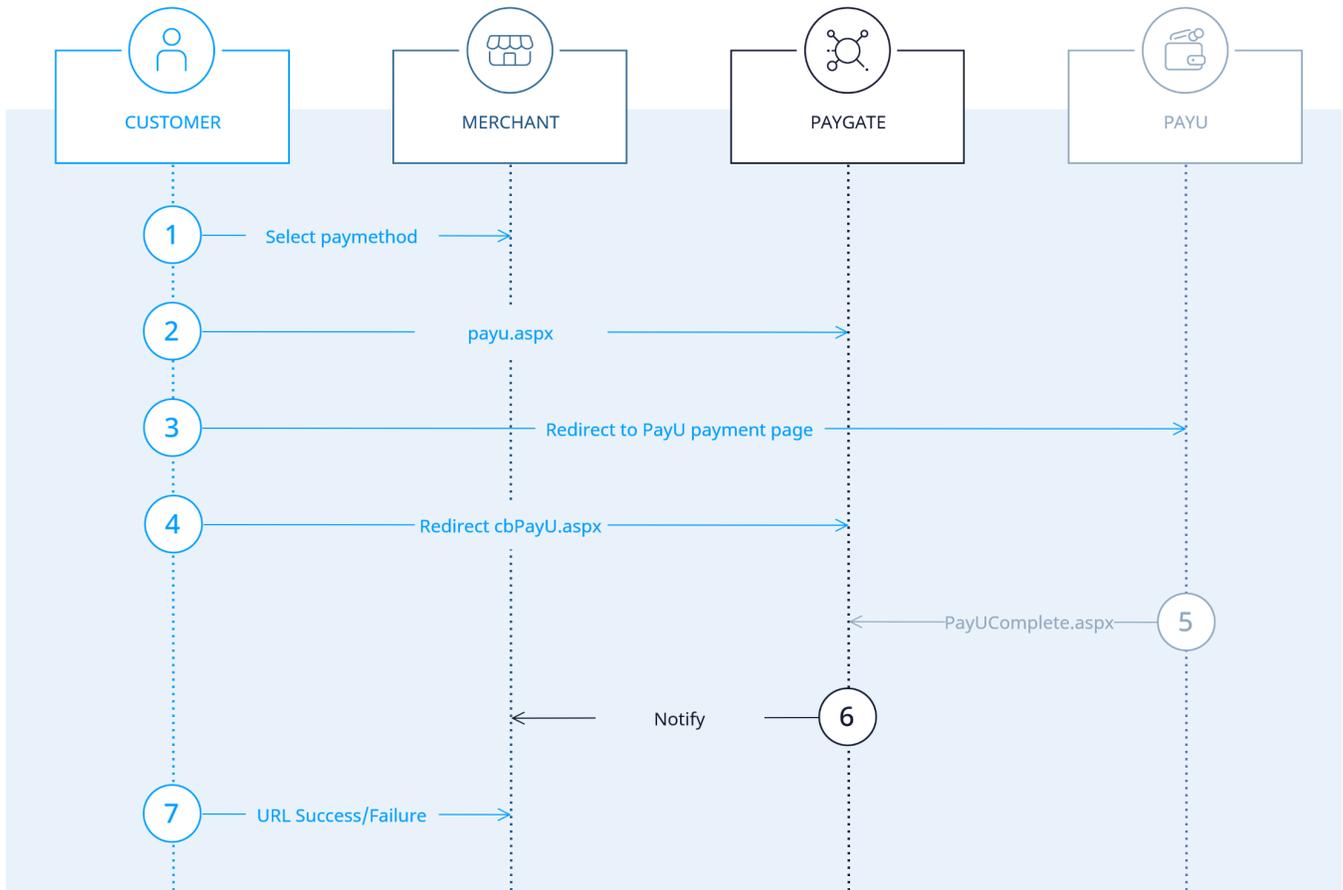

### General information about payment methods via PayU CEE Single

For the PayU Connection there are two different variants of the interface depending on the countries as well as two manuals. This connection PayU CEE Single is valid only for Poland, Czech and Slovakia. For Hungary, Romania, Russia and Turkey the connection PayU CEE GECAD has to be used. For that a separate manual exist: [PayU CEE GECAD](#).

|             |  |

### Definitions

#### Data formats

| Format | Description                                      |
|--------|--|
| a      | alphabetical                                     |
| as     | alphabetical with special characters             |
| n      | numeric  |
| an     | alphanumeric                                     |
| ans    | alphanumeric with special characters             |
| ns     | numeric with special characters                  |
| bool   | boolean expression (true or false)               |
| 3      | fixed length with 3 digits/characters            |
| ..3    | variable length with maximum 3 digits/characters |
| enum   | enumeration of allowed values                    |
| dtm    | ISODateTime (YYYY-MM-DDThh:mm:ss)                |

## Abbreviations

| Abbreviation | Description | Comment   |
|--------------|-------------|---|
| CND          | condition   |   |
| M            | mandatory   | If a parameter is mandatory, then it must be present  |
| O            | optional    | If a parameter is optional, then it can be present, but it is not required  |
| C            | conditional | If a parameter is conditional, then there is a conditional rule which specifies whether it is mandatory or optional |

**Notice:** Please note that the names of parameters can be returned in upper or lower case.

## Payment with PayU CEE Single via form interface

In order to process a payment with PayU CEE Single via a Paygate form, please use the following URL:

<https://www.computop-paygate.com/payu.aspx>

## BLIK OneClick

There are 3 possible scenarios to process a payment using BLIK OneClick.

### Scenario 1: Payment using AuthCode

This scenario is possible for **all** merchants.

To use this option, parameter **PayType** has to be set to "blik" and parameter **AuthCode** contains valid authorization code. Please note, regards this functionality the customer/client/browser will not be forwarded to the Computop Paygate and your shop system will receive only the status by URLNotify response.

### Scenario 2: Payment using AuthCode with token registration

This scenario is possible **only** for merchants, registered as "trusted merchants" on PayU side.

To use this option, parameter **PayType** has to be set to "blik" and parameter **AuthCode** has to contain a valid authorization code.

As the merchant is registered as "trusted merchants" on PayU side, after successful payment a token will be created and registered on PayU side. Registered token is sent in response in scope of JSON object **AllowedPayMethods** (field "value" contains the token, for details refer to description of JSON object AllowedPayMethods below). Additionally the token can be received by call **PayUPayMethods.aspx**.

### Scenario 3: Payment using token

This scenario is possible **only** for merchants, registered as "trusted merchants" on PayU side.

A token, created using Scenario 2, can be used for further payments.

In this scenario payment request should be sent with parameter **PayType** equals to "blik", parameter **TokenExt** and parameter **AppKey** with values returned in parameter **AllowedPayMethods**. **AllowedPayMethods** contains token in field "value" and key is returned in field "key".

**Notice:** For security reasons, Computop Paygate rejects all payment requests with formatting errors. Therefore, please use the correct data type for each parameter.

The following table describes the [encrypted payment request parameters](#):

| Key                        | Format  | CND | Description   |
|----------------------------|---------|-----|---|
| <a href="#">MerchantID</a> | ans..30 | M   | MerchantID, assigned by Computop. Additionally this parameter has to be passed in plain language too. |
| <a href="#">TransID</a>    | ans..64 | M   | TransactionID provided by you which should be unique for each payment                                 |
| <a href="#">refnr</a>      | ns..30  | O   | Merchant's unique reference number  |

| Amount                | n..10  | M  | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit).   |              |             |             |  |               |  |                       |  |
|-----------------------|--|----|--|--------------|-------------|-------------|--|---------------|--|-----------------------|--|
| Currency              | a3   | M  | Currency, three digits DIN / ISO 4217, e.g. EUR, USD, GBP. Only EUR, PLN and CZK permissible. Please find an overview here: <a href="#">A1 Currency table</a>  |              |             |             |  |               |  |                       |  |
| MAC                   | an64   | M  | Hash Message Authentication Code (HMAC) with SHA-256 algorithm. Details can be found here: <ul style="list-style-type: none"> <li>• <a href="#">HMAC Authentication (Request)</a></li> <li>• <a href="#">HMAC Authentication (Notify)</a></li> </ul>   |              |             |             |  |               |  |                       |  |
| URLSuccess            | ans..256   | M  | Complete URL which calls up Paygate if payment has been successful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between Paygate and shop, please use the parameter <a href="#">UserData</a> . <p><b>i Common notes:</b></p> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLSuccess. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>   |              |             |             |  |               |  |                       |  |
| URLFailure            | ans..256   | M  | Complete URL which calls up Paygate if payment has been unsuccessful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between Paygate and shop, please use the parameter <a href="#">UserData</a> . <p><b>i Common notes:</b></p> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLSuccess/URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>   |              |             |             |  |               |  |                       |  |
| Response              | a7   | O  | Status response sent by Paygate to <a href="#">URLSuccess</a> and <a href="#">URLFailure</a> , should be encrypted. For this purpose, transmit <a href="#">Response=encrypt</a> parameter.   |              |             |             |  |               |  |                       |  |
| URLNotify             | ans..256   | M  | Complete URL which Paygate calls up in order to notify the shop about the payment result. The URL may be called up only via port 443. It may not contain parameters: Use the <a href="#">UserData</a> parameter instead. <p><b>i Common notes:</b></p> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLSuccess/URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>   |              |             |             |  |               |  |                       |  |
| UserData              | ans..1024  | O  | If specified at request, Paygate forwards the parameter with the payment result to the shop.   |              |             |             |  |               |  |                       |  |
| ReqID                 | ans..32  | O  | To avoid double payments or actions (e.g. by ETM), enter an alphanumeric value which identifies your transaction and may be assigned only once. If the transaction or action is submitted again with the same ReqID, Computop Paygate will not carry out the payment or new action, but will just return the status of the original transaction or action. <p>Please note that the Computop Paygate must have a finalized transaction status for the first initial action (authentication /authorisation). This does not apply to 3-D Secure authentications that are terminated by a timeout. The 3-D Secure Timeout status does not count as a completed status in which the ReqID functionality on Paygate does not take effect. Submissions with identical ReqID for an open status will be processed regularly.</p> <p><b>Notice:</b> Please note that a ReqID is only valid for 12 month, then it gets deleted at the Paygate.</p> |              |             |             |  |               |  |                       |  |
| Capture               | an..6  | OM | Determines the type and time of capture. <table border="1" data-bbox="414 1444 1237 1621"> <thead> <tr> <th>Capture Mode</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td><b>AUTO</b></td> <td>Capturing immediately after authorisation (default value).</td> </tr> <tr> <td><b>MANUAL</b></td> <td>Capturing made by the merchant. Capture is normally initiated at time of delivery.</td> </tr> <tr> <td><b>&lt;Number&gt;</b></td> <td>Delay in hours until the capture (whole number; 1 to 696).</td> </tr> </tbody> </table>  | Capture Mode | Description | <b>AUTO</b> | Capturing immediately after authorisation (default value). | <b>MANUAL</b> | Capturing made by the merchant. Capture is normally initiated at time of delivery. | <b>&lt;Number&gt;</b> | Delay in hours until the capture (whole number; 1 to 696). |
| Capture Mode          | Description  |    |  |              |             |             |  |               |  |                       |  |
| <b>AUTO</b>           | Capturing immediately after authorisation (default value).                         |    |  |              |             |             |  |               |  |                       |  |
| <b>MANUAL</b>         | Capturing made by the merchant. Capture is normally initiated at time of delivery. |    |  |              |             |             |  |               |  |                       |  |
| <b>&lt;Number&gt;</b> | Delay in hours until the capture (whole number; 1 to 696).                         |    |  |              |             |             |  |               |  |                       |  |
| Order Desc            | ans..35  | M  | Description of purchased goods, unit prices etc.<br>The first 27 characters appear on the customer account statement.  |              |             |             |  |               |  |                       |  |
| Order Desc2           | ans..384   | O  | Quantity and description of the goods purchased, unit prices. Comma-delimited list, no special characters permitted.   |              |             |             |  |               |  |                       |  |
| Article List          | ans..1024  | M  | Article list. These parameters must have the following structure:<br>Product name,unit price,number<br>Several articles can be separated with a +, e.g.: iPhone,700,1+Samsung Galaxy,700,2<br>The sum of prices from ArticleList and ShippingData must be equal to the parameter <b>Amount</b> . If you need to disable this check (e.g. for processing of gift cards) please contact the <a href="#">Computop Helpdesk</a> and also PayU support.   |              |             |             |  |               |  |                       |  |

|                      |           |   |  |
|----------------------|-----------|---|--|
| PayType              | ans..4    | O | Payment method to be used. Possible values can be found in the list <a href="https://developers.payu.com/en/overview.html#paymethods">https://developers.payu.com/en/overview.html#paymethods</a> at Value. E.g., "dpcz" for Twisto CZK.   |
| AuthCode             | n6        | O | For payment method BLIK parameter AuthCode can be transmitted. If it is not transmitted the customer will be redirected to an appropriate page.  |
| TokenExt             | ans..64   | O | For payment method BLIK parameter TokenExt can be transmitted.   |
| AppKey               | ans..32   | O | For payment method BLIK parameter Appkey can be transmitted together with parameter TokenExt.<br><br>In case a customer has accounts in several banks and uses BLIK in each of the banks, parameter AppKey contains application key for which the TokenExt has to be used.   |
| Timeout              | n..3      | O | Time span in seconds within the payment must be executed   |
| Language             | a2        | O | ISO code for language; currently only en, pl, cs permitted   |
| Plain                | ans..50   | O | A single value to be set by the merchant to return some information unencrypted in response/notify, e.g. the MID.<br><br>"Plain"-parameter is part of encrypted "Data" in Computop Paygate and therefore protected against manipulation.   |
| Custom               | ans..1024 | O | "Custom"-parameter is added to the request data before encryption and is part of encrypted "Data" in Computop Paygate request. By this they are protected against manipulation by a consumer.<br><br>The Custom-value is added to the Computop Paygate response in plain text and the " " is replaced by a "&". By this you can put a single value into Custom-parameter and get multiple key-value-pairs back in response for your own purpose.<br><br>Please find a samples here: <a href="#">Custom</a> |
|                      |           |   | <b>Purchaser data</b>  |

| ReqId | ans..32 | O   | <p>To avoid double payments or actions (e.g. by ETM), enter an alphanumeric value which identifies your transaction and may be assigned only once. If the transaction or action is submitted again with the same ReqID, Computop Paygate will not carry out the payment or new action, but will just return the status of the original transaction or action.</p> <p>Please note that the Computop Paygate must have a finalized transaction status for the first initial action (authentication /authorisation). This does not apply to 3-D Secure authentications that are terminated by a timeout. The 3-D Secure Timeout status does not count as a completed status in which the ReqID functionality on Paygate does not take effect. Submissions with identical ReqID for an open status will be processed regularly.</p> <p><b>Notice:</b> Please note that a ReqID is only valid for 12 month, then it gets deleted at the Paygate.</p> | <p>Um Doppelzahlungen (z.B. durch ETM) zu vermeiden, übergeben Sie einen alphanumerischen Wert, der Ihre Transaktion oder Aktion identifiziert und nur einmal vergeben werden darf. Falls die Transaktion oder Aktion mit derselben ReqID erneut eingereicht wird, führt das Computop Paygate keine Zahlung oder weitere Aktion aus, sondern gibt nur den Status der ursprünglichen Transaktion oder Aktion zurück.</p> <p>Bitte beachten Sie, dass das Computop Paygate für die erste initiale Aktion (Authentifizierung/Autorisierung) einen abgeschlossenen Transaktionsstatus haben muss. Dies gilt nicht für 3-D Secure Authentifizierungen, die durch einen Timeout beendet werden. Der Status 3-D Secure Timeout gilt nicht als abgeschlossener Status, bei dem ReqID-Funktionalität am Paygate nicht greift. Einreichungen mit identischer ReqID auf einen offenen Status werden regulär verarbeitet.</p> <p><b>Hinweis:</b> Bitte beachten Sie, dass eine ReqID nur 12 Monate gültig ist, danach wird sie vom Paygate gelöscht.</p> |

| InvoiceFlag       | n1       | O | Defines if tick for invoice dispatch is displayed on the PayU page.<br><br>1 = tick is displayed<br><br>0 = tick is not displayed   | Legt fest, ob der Haken zum Rechnungsversand auf der PayU-Seite angezeigt wird.<br><br>1 = Haken wird angezeigt<br><br>0 = Haken wird nicht angezeigt   |

#### Parameters for payments with PayU CEE Single

The following table gives the result parameters which Computop Paygate transmits to **URLSuccess** or **URLFailure** and **URLNotify**. If you have specified the **Response=encrypt** parameter, the following parameters are sent **Blowfish encrypted** to your system:

 pls. be prepared to receive additional parameters at any time and do not check the order of parameters

 the key (e.g. MerchantId, RefNr) should not be checked case-sensitive

| Key | Format  | CND | Description                      |
|-----|---------|-----|----------------------------------|
| mid | ans..30 | M   | MerchantID, assigned by Computop |

|               |           |   |  |
|---------------|-----------|---|--|
| PayID         | an32      | M | ID assigned by Paygate for the payment, e.g. for referencing in batch files as well as for capture or credit request.  |
| XID           | an32      | M | ID for all single transactions (authorisation, capture, credit note) for one payment assigned by Paygate   |
| TransID       | ans..64   | M | TransactionID provided by you which should be unique for each payment  |
| refnr         | ns..30    | O | Merchant's unique reference number   |
| Status        | a..30     | M | OK, FAILED or AUTHORIZE_REQUEST.<br><br>If <b>10 seconds</b> after the redirect to CallBack page no notify is received from PayU, the status "AUTHORIZE_REQUEST", Code "00000000" and Description "REQUEST" is submitted to the URLSuccess.<br><br>Please note, the status "AUTHORIZE_REQUEST" will be sent only to URLSuccess and there is no call of URLNotify.<br><br>Should Computop Paygate receive a further final PayU status for this open payment, it will be sent separately via URLNotify. If you don't want to process a separate final status via URLNotify this open payment can be cancelled via calling reverse.aspx and should PayU nevertheless receive a revenue this will automatically be refunded to the customer. |
| Description   | ans..1024 | M | Further details in the event that payment is rejected. Please <b>do not</b> use the <b>Description</b> but the <b>Code</b> parameter for the transaction status analysis!  |
| Code          | n8        | M | Error code according to Paygate Response Codes ( <a href="#">A4 Error codes</a> )  |
| CodeExt       | n..10     | O | Error code from PayU, if agreed with <a href="#">Computop Helpdesk</a>   |
| ErrorText     | ans..256  | O | Error text from PayU, if agreed with <a href="#">Computop Helpdesk</a>   |
| MAC           | an64      | M | Hash Message Authentication Code (HMAC) with SHA-256 algorithm. Details can be found here: <ul style="list-style-type: none"> <li><a href="#">HMAC Authentication (Request)</a></li> <li><a href="#">HMAC Authentication (Notify)</a></li> </ul>   |
| UserData      | ans..1024 | O | If specified at request, Paygate forwards the parameter with the payment result to the shop.   |
| Plain         | ans..50   | O | A single value to be set by the merchant to return some information unencrypted in response/notify, e.g. the MID.<br><br>"Plain"-parameter is part of encrypted "Data" in Computop Paygate and therefore protected against manipulation.   |
| Custom        | ans..1024 | O | "Custom"-parameter is added to the request data before encryption and is part of encrypted "Data" in Computop Paygate request. By this they are protected against manipulation by a consumer.<br><br>The Custom-value is added to the Computop Paygate response in plain text and the " " is replaced by a "&". By this you can put a single value into Custom-parameter and get multiple key-value-pairs back in response for your own purpose.<br><br>Please find a samples here: <a href="#">Custom</a>   |
| TransactionID | ans..32   | O | ID for identification with PayU  |
| AmountAuth    | n..10     | M | Authorized amount in the smallest currency unit (e.g. PLN Grosz)   |
| AmountCap     | n..10     | M | Captured amount in the smallest currency unit (e.g. PLN Grosz)   |
| AmountCred    | n..10     | M | Credited amount in the smallest currency unit (e.g. PLN Grosz)   |

|                  |           |   |   |

Return parameters for URLSuccess, URLFailure and URLNotify with PayU CEE Single

## Allowed Payment Methods

The request returns Blik token associated with the customer in this specific merchant/web shop.

The request can be used to retrieve the token before using it for Blik payment with token (Scenario 3).

<https://www.computop-paygate.com/PayUPayMethods.aspx>

**Notice:** For security reasons, Computop Paygate rejects all payment requests with formatting errors. Therefore, please use the correct data type for each parameter.

The following table describes the [encrypted payment request parameters](#):

| Key                        | Format   | CND | Description  |
|----------------------------|----------|-----|--|
| <a href="#">MerchantID</a> | ans..30  | M   | MerchantID, assigned by Computop. Additionally this parameter has to be passed in plain language too.  |
| <a href="#">Amount</a>     | n..10    | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit).   |
| <a href="#">Currency</a>   | a3       | M   | Currency, three digits DIN / ISO 4217, e.g. EUR, USD, GBP. Please find an overview here: <a href="#">A1 Currency table</a>   |
| <a href="#">CustomerID</a> | ans..64  | M   | Identifier of the customer in merchant's system/web shop.<br>Must be the same as in token registration request (Blik Scenario 2).  |
| <a href="#">Email</a>      | ans..100 | M   | Email address of the customer<br>Must be the same as in token registration request (Blik Scenario 2).  |
| <a href="#">MAC</a>        | an64     | M   | Hash Message Authentication Code (HMAC) with SHA-256 algorithm. Details can be found here: <ul style="list-style-type: none"> <li><a href="#">HMAC Authentication (Request)</a></li> <li><a href="#">HMAC Authentication (Notify)</a></li> </ul> |

|       |         |   |   |
|-------|---------|---|---|
| ReqID | ans..32 | O | <p>To avoid double payments or actions (e.g. by ETM), enter an alphanumeric value which identifies your transaction and may be assigned only once. If the transaction or action is submitted again with the same ReqID, Computop Paygate will not carry out the payment or new action, but will just return the status of the original transaction or action.</p> <p>Please note that the Computop Paygate must have a finalized transaction status for the first initial action (authentication /authorisation). This does not apply to 3-D Secure authentications that are terminated by a timeout. The 3-D Secure Timeout status does not count as a completed status in which the ReqID functionality on Paygate does not take effect. Submissions with identical ReqID for an open status will be processed regularly.</p> <p><b>Notice:</b> Please note that a ReqID is only valid for 12 month, then it gets deleted at the Paygate.</p> |
|-------|---------|---|---|

Parameters for Allowed Payment Methods response.

## Credit card payment with PayU CEE Single via form interface

In order to process a credit card payment with PayU CEE Single via a Paygate form, please use the following URL:

<https://www.computop-paygate.com/payssl.aspx>

**Notice:** For security reasons, Computop Paygate rejects all payment requests with formatting errors. Therefore, please use the correct data type for each parameter.

The following table describes the [encrypted payment request parameters](#):

| Key                        | Format  | CND | Description  |
|----------------------------|---------|-----|--|
| <a href="#">MerchantID</a> | ans..30 | M   | MerchantID, assigned by Computop. Additionally this parameter has to be passed in plain language too.  |
| <a href="#">TransID</a>    | ans..64 | M   | TransactionID provided by you which should be unique for each payment  |
| <a href="#">refnr</a>      | ns..30  | O   | Unique reference number which appears on your printed card account or in the EPA-file (Electronic Payment Advice). Format must be mutually agreed beforehand with Computop!  |
| <a href="#">Amount</a>     | n..10   | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit).   |
| <a href="#">Currency</a>   | a3      | M   | Currency, three digits DIN / ISO 4217, e.g. EUR, USD, GBP. Please find an overview here: <a href="#">A1 Currency table</a>   |
| <a href="#">MAC</a>        | an64    | M   | Hash Message Authentication Code (HMAC) with SHA-256 algorithm. Details can be found here: <ul style="list-style-type: none"> <li><a href="#">HMAC Authentication (Request)</a></li> <li><a href="#">HMAC Authentication (Notify)</a></li> </ul> |

|                                  |           |   |   |
|----------------------------------|-----------|---|---|
| URLS<br>uccess                   | ans..256  | M | <p>Complete URL which calls up Paygate if payment has been successful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between Paygate and shop, please use the parameter <a href="#">UserData</a>.</p> <p><b>i Common notes:</b></p> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLSuccess. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>  |
| URLF<br>ailure                   | ans..256  | M | <p>Complete URL which calls up Paygate if payment has been unsuccessful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between Paygate and shop, please use the parameter <a href="#">UserData</a>.</p> <p><b>i Common notes:</b></p> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLSuccess/URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>  |
| Respo<br>nse                     | a7        | O | Status response sent by Paygate to <a href="#">URLSuccess</a> and <a href="#">URLFailure</a> , should be encrypted. For this purpose, transmit <a href="#">Response=encrypt</a> parameter.  |
| URLN<br>otify                    | ans..256  | M | <p>Complete URL which Paygate calls up in order to notify the shop about the payment result. The URL may be called up only via port 443. It may not contain parameters: Use the <a href="#">UserData</a> parameter instead.</p> <p><b>i Common notes:</b></p> <ul style="list-style-type: none"> <li>• We recommend to use parameter "response=encrypt" to get an encrypted response by Paygate</li> <li>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLSuccess/URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful.</li> </ul>   |
| UserD<br>ata                     | ans..1024 | O | If specified at request, Paygate forwards the parameter with the payment result to the shop.  |
| ReqId                            | ans..32   | O | <p>To avoid double payments or actions (e.g. by ETM), enter an alphanumeric value which identifies your transaction and may be assigned only once. If the transaction or action is submitted again with the same ReqID, Computop Paygate will not carry out the payment or new action, but will just return the status of the original transaction or action.</p> <p>Please note that the Computop Paygate must have a finalized transaction status for the first initial action (authentication /authorisation). This does not apply to 3-D Secure authentications that are terminated by a timeout. The 3-D Secure Timeout status does not count as a completed status in which the ReqID functionality on Paygate does not take effect. Submissions with identical ReqID for an open status will be processed regularly.</p> <p><b>Notice:</b> Please note that a ReqID is only valid for 12 month, then it gets deleted at the Paygate.</p> |
| RTF                              | a1        | O | „I“ for initializing recurrent payments   |
| Order<br>Desc                    | ans..35   | M | <p>Description of purchased goods, unit prices etc.</p> <p>The first 27 characters appear on the customer account statement.</p>  |
| Order<br>Desc2                   | ans..384  | O | Quantity and description of the goods purchased, unit prices. Comma-delimited list, no special characters permitted.  |
| Plain                            | ans..50   | O | <p>A single value to be set by the merchant to return some information unencrypted in response/notify, e.g. the MID.</p> <p>"Plain"-parameter is part of encrypted "Data" in Computop Paygate and therefore protected against manipulation.</p>   |
| Custom                           | ans..1024 | O | <p>"Custom"-parameter is added to the request data before encryption and is part of encrypted "Data" in Computop Paygate request. By this they are protected against manipulation by a consumer.</p> <p>The Custom-value is added to the Computop Paygate response in plain text and the " " is replaced by a "&amp;". By this you can put a single value into Custom-parameter and get multiple key-value-pairs back in response for your own purpose.</p> <p>Please find a samples here: <a href="#">Custom</a></p>   |

| Custom | ans..1024 | O   | <p>"Custom"-parameter is added to the request data before encryption and is part of encrypted "Data" in Computop Paygate request. By this they are protected against manipulation by a consumer.</p> <p>The Custom-value is added to the Computop Paygate response in plain text and the " " is replaced by a "&amp;". By this you can put a single value into Custom-parameter and get multiple key-value-pairs back in response for your own purpose.</p> <p>Please find a samples here: <a href="#">Custom</a></p> | <p>Der "Custom"-Parameter wird vor der Verschlüsselung an den Aufruf angehängt und ist Teil des verschlüsselten "Data" im Computop Paygate Aufruf. Dadurch ist der Wert gegen Manipulation geschützt.</p> <p>Der Custom-Wert wird dann in Klartext an die Computop Paygate-Antwort angehängt und dabei wird " " durch "&amp;" ersetzt. Dadurch können Sie einen Custom-Wert übergeben und bekommen mehrere Key-Value-Paare zu Ihrer eigenen Verwendung in der Antwort zurück.</p> <p>Hier finden Sie ein Beispiel: <a href="#">Custom</a></p> |

| Key            | Format  | CND | Description  | Beschreibung  |

| CodeExt   | n..10    | O   | Error code from PayU, if agreed with <a href="#">Computop Helpdesk</a> | Fehlercode von PayU, wenn mit <a href="#">Computop Helpdesk</a> abgesprochen |
| ErrorText | ans..256 | O   | Error text from PayU, if agreed with <a href="#">Computop Helpdesk</a> | Fehlertext von PayU, wenn mit <a href="#">Computop Helpdesk</a> abgesprochen |

Response parameters for credit payments with PayU CEE Single via socket connection

## Reversal

Reversals are possible via a Server-to-Server connection. To carry out a reversal, please use the following URL:

<https://www.computop-paygate.com/reverse.aspx>

**Notice:** Reverse.aspx does not only reverse authorisations, but any LAST TRANSACTION STAGE!! If the last transaction was a capture, Reverse.aspx initiates the reverse, e.g. a credit. Therefore, the utmost caution is urged. Use is at your own risk. We recommend checking the transaction status with Inquire.aspx before using Reverse.aspx.

**Notice:** For security reasons, Computop Paygate rejects all payment requests with formatting errors. Therefore, please use the correct data type for each parameter.

The following table describes the [encrypted payment request parameters](#):

| Key        | Format  | CND | Description  |
|------------|---------|-----|--|

Response parameters for reversals of payments with PayU CEE Single

## Batch processing via the interface

Basic information about using Batch files and about their structure can be found in the Batch Manager manual. Within batch processing not all functions are available which are usually available for the online interface.

This section describes the parameters which must be transferred within the data set (**Record**) for executing payments / credits with PayU CEE Single and which information can be found within the response file about the payment status.

Following table gives an overview of all batch versions that are possible for a specific action and their specialities:

| Action  | Version   | Description                                       |
|---------|-----------|---|
| Capture | 1.0 / 2.0 | Standard version without return of parameter Code |

|        |           |  |
|--------|-----------|--|
|        | 1.x / 2.x | with RefNr (valid for all versions other than 1.0) |
| Credit | 1.0 / 2.0 | Standard version without return of parameter Code  |
|        | 1.x / 2.x | with RefNr (valid for all versions other than 1.0) |

Description of the possible batch versions

The structure for a PayU payment within a Batch file to be submitted is the following:

```
HEAD,<MerchantID>,<Date>,<Version>
PayU,Capture,<Amount>,<Currency>,<TransID>,( <RefNr> , )<PayID>
PayU,Credit,<Amount>,<Currency>,<TransID>,( <RefNr> , )<PayID>
FOOT,<CountRecords>,<SumAmount>
```

Example for Master MID function:

```
HEAD,[Master]MerchantID,Date,2.x
Type,Action,[Slave]MID,Amount,Currency,TransID,Data (depends on Action)
FOOT,CountRecords,SumAmount
```

The following table describes the individual fields and values used within the data set (record) in the batch file:

| Key      | Format  | CND | Description  |
|----------|---------|-----|--|
| Type     | a..11   | M   | HEAD for Header, FOOT for Footer, PayU for PayU  |
| Action   | a..20   | M   | The parameter Action defines the type of transaction:<br>Capture<br>Credit   |
| Amount   | n..10   | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit). |
| Currency | a3      | M   | Currency, three digits DIN / ISO 4217, e.g. EUR, USD, GBP. Please find an overview here: <a href="#">A1 Currency table</a>   |
| TransID  | ans..64 | M   | TransactionID provided by you which should be unique for each payment  |
| refnr    | ns..30  | O   | Merchant's unique reference number   |
| PayID    | an32    | M   | ID assigned by Paygate for this transaction  |

| Key    | Format | CND | Description  | Beschreibung  |
|--------|--------|-----|--|---|
| Amount | n..10  | M   | Amount in the smallest currency unit (e.g. EUR Cent). Please contact the <a href="#">Computop Helpdesk</a> , if you want to capture amounts <100 (smallest currency unit). | Betrag in der kleinsten Währungseinheit (z.B. EUR Cent). Bitte wenden Sie sich an den <a href="#">Computop Helpdesk</a> , wenn Sie Beträge < 100 (kleinste Währungseinheit) buchen möchten. |

| Key      | Format | CND | Description  | Beschreibung  |
|----------|--------|-----|--|---|
| Currency | a3     | M   | Currency, three digits DIN / ISO 4217, e.g. EUR, USD, GBP. Please find an overview here: <a href="#">A1 Currency table</a> | Währung, drei Zeichen DIN / ISO 4217, z.B. EUR, USD, GBP. Hier eine Übersicht: <a href="#">A1 Währungstabelle</a> |

| Key     | Format  | CND | Description   | Beschreibung   |
|---------|---------|-----|---|--|
| TransID | ans..64 | M   | TransactionID provided by you which should be unique for each payment | Ihre eigene TransaktionsID, die für jede Zahlung eindeutig sein muss |

| Key   | Format | CND | Description                        | Beschreibung                           |
|-------|--------|-----|------------------------------------|--|
| refnr | ns..30 | O   | Merchant's unique reference number | Eindeutige Referenznummer des Händlers |

| Key | Format | CND | Description | Beschreibung |
|-----|--------|-----|-------------|--------------|
|-----|--------|-----|-------------|--------------|

|       |      |   |   |  |
|-------|------|---|---|--|
| PayID | an32 | M | ID assigned by Paygate for this transaction | Vom Paygate vergebene ID für diese Transaktion |
|-------|------|---|---|--|

Description of fields within the record for Batch files

The record area within the response file for Batch transactions looks as follows:

```
HEAD, <MerchantID>, <Date>, <Version>
PayU, Capture, <Amount>, <Currency>, <TransID>, ( <RefNr>, ) <PayID>, <Status>, <Code>
PayU, Credit, <Amount>, <Currency>, <TransID>, ( <RefNr>, ) <PayID>, <Status>, <Code>
FOOT, <CountRecords>, <SumAmount>
```

The following table describes the response parameters which the Batch Manager saves in the Record area for each transaction (standard parameters not explained here, such as <TransID> or <RefNR> and request parameters are returned unchanged and correspond to the call as specified before):

| Key    | Format | CND | Description   |
|--------|--------|-----|---|
| Action | a..20  | M   | The parameter Action defines the type of transaction:<br>Capture<br>Credit        |
| PayID  | an32   | M   | ID assigned by Paygate for this transaction                                       |
| Status | a..50  | M   | OK ( <a href="#">URLSuccess</a> ) or FAILED ( <a href="#">URLFailure</a> )        |
| Code   | n8     | M   | Error code according to Paygate Response Codes ( <a href="#">A4 Error codes</a> ) |
