New password

Change settings

New password

Password rules:

- differing from the last 4 passwords
- 8 to 20 characters long
- each have at least one digit, one special character and one uppercase letter

Current password

New password

New Password (repeat)

Cancel action

Confirm

1. Input fields for changing the password
2. "Confirm" Button

Rules when changing a password

For a new password to be valid, it must meet the following criteria:

- 8 to 20 characters long
- At least one digit, one special character, and one uppercase letter
- Different to the last four passwords

1. Enter the current password and the new password.

2. Click on the "Confirm" button.

If the password meets the rules for choosing a password (see above), the message "Password successfully changed" will appear in green. If the password does not meet the rules for choosing a password and is therefore invalid, a message showing the reason why will appear in red.
