Breakdown of transactions by paymethod for a selected currency

This evaluation shows you a breakdown of your transactions by paymethod for a selected currency. The circular chart breaks down the amount per paymethod for the selected currency, with the amounts per paymethod shown in the table below it. Individual displays can be configured using the [filter](#).

1. Authorised transactions
2. Captured transactions
3. Refunded transactions
4. Hide paymethod

Paymethod chart

The paymethods are sorted in descending order according to the percentage they account for. If you click on a paymethod, then the paymethod you clicked will be hidden in the circular chart. The percentage is distributed among the remaining paymethods.

A complete overview of your transactions and amounts

This evaluation provides you with a full list of your transactions and amounts, which you can configure individually.

The screenshot shows the 'Complete overview of your transactions and amounts' dashboard. It includes a table with columns for Merchant, Currency, Brand, Payment method, Count transactions, and Amount authorized. A sidebar on the right allows for column configuration. The table shows data for various merchants and payment methods.
